

Augmented Reality Art Guide

Use your Phone, Tablet or Ipad to see my exhibition on any wall, right now, FOR FREE.
ArtBeamer is the easiest way to preview how this will look in place, just follow steps below.

I have spent 30 years working in print, web & 3D Design throughout Europe & the USA. I now produce digital art from my studio in Newry. I Paint digitally using a stylus & specialist software and print using high end print houses. I hand texture some pieces using traditional glazing techniques with modern polymers up to 40 layers deep.

I use Augmented reality to help sell my work online. By using a simple app you can see my artwork on any wall at real scale, giving an unprecedented way to see how the artwork suits your surroundings, while being able to zoom in and inspect the very brush strokes in each piece.

I accept private commissions, portraits being a speciality. Any of the pieces viewable on my ArtBeamer gallery are for sale also, just drop me a quick email: cathal@mcdonnellart.com
